Baccalaureate in experimental sciences	Annaba, Algeria
University of Badji Mokhtar	2022– 2025
Bachelor's degree in computer science, information systems and engineering	Annaba, Algeria

Professional Experience

Frontend Developer   Aug 2024 - Present
                                                                                     France (Remote)

- I built a full-featured merchant dashboard using Next.js, React, TypeScript and a modular design system, allowing mall shops to manage their activity from a single interface.
- I implemented core back-office features: order management (online & in-store with QR payments), product catalog with filters and server-side pagination, promotions management, wallet (balance, actions, transaction history) and profile pages.
- I focused on reusable UI components, robust UX (filters, confirmation dialogs, skeleton loaders, toasts) and clean data fetching patterns to keep the dashboard fast, maintainable and ready to scale.

Full Stack Developer   Sep 2024 - Present
Naviresto   France (Remote)

- I handled full-stack mobile and web development in Naviresto, by maintaining and adding new features with Next.js,NestJS (MongoDB), React Native et Expo.
- Project management via Jira and Agile methods.
- Used GitHub for issues, pull requests, and effective code collaboration.

Mobile Developer   Oct - Nov 2025
Createk Solution   Annaba (Remote)

- At Createk Solution, I had the opportunity to develop a brand new mobile application using React Native and Expo, with an emphasis on creating a smooth and enjoyable user experience.
- I worked with the latest EAS features, managing development, preview and production environments to make the build and deployment process much simpler and more reliable.
- Working closely with the backend developers, I helped integrate the APIs seamlessly, ensuring that the application worked smoothly and provided real added value to users.

Mobile Developer   Sept - Nov 2025
Createk Solution   Annaba (Remote)

- As a web developer, I contributed to the maintenance and improvement of the user interface and the user experience of web applications, making them more intuitive and user-friendly.
- I fixed bugs, improved performance and optimized SEO to ensure faster, smoother and easier-to-find websites.
- I collaborated closely with the teams to coordinate deployments, ensuring that the updates to day be delivered reliably and efficiently.

Full Stack Developer   Aug - Sept 2025

CapFun Seraidi   Annaba (Remote)
- I developed a complete online booking platform for the Capfun Seraidi adventure park, allowing customers to discover and book activities in real time, and securing payments through the API.Chargilyand to benefit from a smooth booking flow.
- Technologies: Next.js, NestJS, Prisma, PostgreSQL, Tailwind, Chargily API

Full Stack Developer   Sep- June 2024
Forest Adventure   Annaba (Remote)
- I developed a multi-park adventure booking platform with customizable schedules, activity distribution, dynamic pricing, and secure online payments usingChargilyPay, built with a Next.js frontend (Shadcn/ui) and a NestJS backend.
- I used PostgreSQL with Prisma ORM for scalable, maintainable and reliable data management.

Technical skills

Programming languages: JavaScript, TypeScript, Python, PHP.
Frontend Development: HTML, CSS, React, Tailwind CSS, Next.js, Vue.js
Backend Development: Express.js, Nest.js, API REST, PHP
Databases: MongoDB, PostgreSQL, MySQL, SQLite, Redis
Mobile development: React Native, Expo
Services cloud: AWS Lambda, AWS S3, AWS EC2
DevOps and CI/CD: Docker, Docker Compose, CI/CD pipelines, deployment to subdomains for development and production
Project management: Agile methodologies, Scrum, GitHub
